

**Binogi Video: Circles**  
 Bilingual Concept List  
The Escape Projects

<p><b>Circumference (c)</b></p> <p>The perimeter of a circle or the length of a line that makes a circle.</p>	<p><b>Add your own language!</b></p>	
<p><b>Diameter (d)</b></p> <p>A straight line (or the distance) from one side of a circle or sphere to the other side that passes through the center point.</p>		
<p><b>Radius (r)</b></p> <p>A straight line from the center of a circle or sphere to any point on the outer edge of that shape.</p>		
<p><b>Sector</b></p> <p>A geometric figure bounded by two radii.</p>		

<p><b>Pi (<math>\pi</math>)</b></p> <p>A Greek letter used in geometry to represent the ratio of a circle's circumference to its diameter.</p> <p>(Pi is equal to 3.14~)</p>		
<p><b>Angle (<math>\sphericalangle</math>)</b></p> <p>How far a line is rotated in relation to another line. Measured in degrees.</p>		
<p><b>Central Angle (<math>\sphericalangle AOB</math>)</b></p> <p>A central angle is an angle whose apex is the center of a circle and whose sides intersect the circle in two distinct points A and B.</p>		
<p><b>Arc (s)</b></p> <p>A part of a curved line, especially the outer edge of a circle, between any two points on it.</p>
