

Binogi Video: Circuits in Series and in Parallel
 English Bilingual Concept List
The Escape Projects

<p>Electrical Current The rate at which electrical charge flows past a point in a circuit.</p>	<p>电流 电荷流过电路中某一点的速率。</p>	
<p>Discharge The process whereby electrons move from a negatively charged place to a more positively charged place in order to even out an imbalance of charges.</p>	<p>放电 电子从带负电的地方移动到带正电的地方以平衡电荷不均的过程。</p>	
<p>Voltage A measure of the difference in electrical charge between two points in a circuit.</p>	<p>电压 测量电路中两点之差的一种方法。</p>	
<p>Circuit A closed pathway that an electric current travels along.</p>	<p>电路 电流通过的封闭通道。</p>	
<p>Volt A unit for measuring the force that moves an electric current.</p>	<p>伏特 测量移动电流的力的一种单位。</p>
