

Binogi Video: [Greenhouse Gases](#)
 English-Mandarin Bilingual Concept List
The Escape Projects

<p>Emissions Substances that leak out or are left over after production, transport or other processes, like exhaust fumes from a car or soot from a factory chimney.</p>	<p>排放物 经过生产运输或者其他过程后泄漏或遗留的物质，如汽车尾气或者工厂烟囱排放出来的烟尘。</p>	
<p>Global Warming A gradual increase in the average temperature of the Earth's atmosphere and its oceans due to the presence of gases that trap heat that would otherwise escape from the atmosphere.</p>	<p>全球变暖 大气和海洋的平均温度逐渐上升的现象，这是由于能够储蓄热量的气体存在，否则热气将从大气中逃逸。</p>	
<p>Methane A colourless, flammable gas made up of hydrogen and carbon that can be burned as fuel. Released as a by-product when organic matter decomposes. Considered a natural gas.</p>	<p>甲烷 由氢和碳组成并可作为燃料进行燃烧的一种无色可燃气体。当有机分解时会作为副产品释放，被认为是天然气。</p>	
<p>Fossil Fuel A fuel (like coal, oil or natural gas) formed in the Earth from plants and animal remains.</p>	<p>化石燃料 由植物和动物遗骸在地球上形成的燃料（如煤、石油或者天然气）。</p>	
<p>Greenhouse Gases A gas in Earth's atmosphere that absorbs heat and traps that heat in the atmosphere. Examples include water vapour, carbon dioxide and methane.</p>	<p>温室气体 地球大气中可以吸收热量并将热量滞留在大气中的一种气体。例如水蒸气、二氧化碳和甲烷。</p>	
<p>Freons One of many gases or liquids used in refrigerators and aerosol sprays, which have been found to contribute to global warming.</p>	<p>氟利昂 用于冰箱和气溶胶喷雾中众多气体或者液体中的一种，其被发现导致了全球变暖。</p>	
<p>Flatulent Having gaseous build up in the digestive system, which leads to passing gas.</p>	<p>胀气的 在消化系统中聚集气体，并导致排气。</p>	

<p>Solar Radiation All of the light and energy that comes from the sun, including the light that we see and the heat that we feel.</p>	<p>太阳辐射 所有来自太阳的光和能量，包含我们可见的光和可感的热量。</p>	 An illustration of a solar panel in a field of yellow flowers under a bright sun with rays of light.
