

**Binogi Video: [Static Electricity](#)**  
 English-Mandarin Bilingual Concept  
 List [The Escape Projectss](#)

Concept in English	Mandarin	Picture
<p><b>Nucleus (nuclei)</b>            The central part of an atom that is made up of protons and neutrons.</p>	<p>原子核            原子的中心部位，由质子和中子构成。</p>	
<p><b>Proton (protons)</b>            A very small particle that is found in an atom and has a positive electrical charge.</p>	<p>质子            原子中的一种非常小的粒子，带有正电荷。</p>	
<p><b>Electron (electrons)</b>            A very small particle that is found in an atom and has a negative electrical charge.</p>	<p>电子            原子中的一种非常小的粒子，带有负电荷。</p>	
<p><b>Electricity (electrical energy)</b>            A form of energy that consists of the movement of electrons from one place to another.</p>	<p>电（电能）            电子从一个地方移动到另一个地方的能量形式。</p>	
<p><b>Discharge (discharges, discharging)</b>            The process whereby electrons move from a negatively charged place to a more positively charged place in order to even out an imbalance of charges.</p>	<p>放电            电子从带负电的地方移动到带正电的地方以平衡电荷不均的过程。</p>
