

Binogi Video: Multiplication with fractions
 English-Mandarin Bilingual Concept List
The Escape Projects

<p>Fraction (fractions) A numerical term which indicates that one number, called the numerator, is being divided by another number, called the denominator.</p>	<p>分数 一种数字术语，表示称为分子的一个数字被另外一个称为分母的数字所除。</p>	
<p>Numerator The part of a fraction that is above the line.</p>	<p>分子 分数线上方的部分。</p>	
<p>Denominator The part of a fraction that is below the line.</p>	<p>分母 分数线下方的部分。</p>	
<p>Mixed fraction (mixed number) A number that is made up of a whole number and a fraction written together.</p>	<p>积 当把两个或更多项相乘时得到的答案。</p>	
<p>Product The answer you get when you multiply two or more terms together.</p>	<p>带分数 由一个整数和一个分数组成的数。</p>	
<p>Cross simplification A way to simplify fractions when you are multiplying them. To do this, you divide the denominator of one fraction and the numerator of the other fraction, by the same number.</p>	<p>交叉化简 当将两个分数相乘时一种化简分数的方式。需要将一个分数的分母与另一个分数的分子除以同一个数。</p>
