The Escape Projects

Concept in English	<i>Add the Concept in another Language</i>	Picture
<p>Turbine A machine that is made up of a series of blades that are spun by pressure from water, steam or air, in order to generate power.</p>		
<p>Generator A machine that generates electricity by converting kinetic energy into electrical energy.</p>		
<p>Global Warming A gradual increase in the average temperature of the Earth's atmosphere and its oceans due to the presence of gases that trap heat that would otherwise escape from the atmosphere.</p>		
<p>Incinerator A large chamber or container for burning waste materials or garbage.</p>		
<p>District Heating System A network of pipes used to deliver heat, in the form of hot water or steam, from a heating plant to houses, buildings and industrial areas.</p>		
<p>Methane A colourless, flammable gas made up of hydrogen and carbon that can be burned as fuel. Released as a by-product when organic matter decomposes. Considered a natural gas.</p>
