Make sure you don't spill any of this liquid – it's corrosive. Some substances are harmful to the environment – and cannot be poured down the sink – nor thrown in normal trash. Watch out for substances that are dangerous to inhale, or that have to be handled carefully to avoid health hazards. There are also rules for how you should mix different things. If, for example, you were to pour water into a strong acid...

Rewordify text

Make sure you don't spill any of this liquid - it's (causing slow chemical destruction). Some substances are harmful to (the health of the Earth/the surrounding conditions) - and cannot be poured down the sink - nor thrown in (usual/ commonly and regular/ healthy) trash. Watch out for substances that are dangerous to inhale, or that have to be handled carefully to avoid health dangers/risks. There are also rules for how you should mix different things. If, for example, you were to pour water into a strong acid...

**Tips:**

- ▶ Click the highlighted words to learn them and hear them. Click the non-highlighted words, too.
- ▶ Change how you learn on the [settings page](#). Also, you can print [vocab lists](#), [quizzes](#), and [more](#).
- ▶ When you log in, everything you rewordify is [auto-saved and can be easily shared](#).
